Buy-Side Trading Solutions

FlexTRADER EMS

BTON Trader Co-Pilot

Converging strategies to a single point of innovation

Push the Button

BTON, a plug-in within FlexTRADER EMS, seamlessly integrates into your workflow without any disruptions. There's no need for extensive setup or training – plug in and start optimising your trading performance immediately. Push the button - that's it.

Much Bigger Data

Collective intelligence is the shared or group intelligence that emerges when people work together with the help of technology to solve complex problems. BTON's data collaboration platform helps achieve a larger, statistically relevant, and collaborative dataset that leads to real outperformance.

AI Algo Recommendation

As trading technology evolves, the notion of stumbling upon the most optimal execution algo by randomising the flow in an algo-wheel is getting quickly outdated. Thanks to BTON's innovative approach to algo selection, the art of trading is now fueled by recommendation of well-trained algorithms that have transformed how we select our brokers.

Best Execution

With data-driven insights leveraging Transaction Cost Analysis (TCA) data from across our customer base, BTON continuously refines and improves your trading outcomes. This collaborative approach ensures that our platform continuously evolves, providing you with valuable insights to inform your trading decisions, delivering efficient execution while adhering to market-leading best execution practices.

Next-Gen Trading Desk

With bias removal and broker-neutral allocation, we offer a simple yet powerful solution for maximizing efficiency and performance in markets regardless of volatility. With seamless integration into FlexTrade, we believe this is an essential addition to securing the future of your trading desk.

Now, more than ever, the perfect addition to your trading toolkit.
