About us

FlexTrade Systems is a global financial technology firm that aims to boost trading efficiency by simplifying the complexities of today's trading workflows by providing a unified, open-architecture multi-asset sell-side trading platform. FlexTrade achieves this by underpinning cutting-edge, API-rich technology with highly-specialized service and support for high touch and low touch businesses across cash, program trading, futures & options, ETF, swaps, and foreign exchange workflows. Whether the focus is market-making, agency, retail, or proprietary trading desks, FlexTrade can enhance STP for the complete order management lifecycle from order receipt and trading to middle and back-office workflows, in a single modular technology platform.
