

## Sell-Side Trading Solutions

# FlexOMS™

A new credible alternative to existing  
Sell-Side OMS solutions

## Why Partner with FlexTrade for Sell-Side Order Management?

Sell-side desks have fewer options to improve their operations, technology, and services after vendor consolidation. What makes FlexOMS a credible alternative in the market today for those struggling with their current OMS solution and vendor relationship?

### Support all your workflows in a unified platform

FlexOMS delivers a unified, automated solution that covers a range of workflows, including Cash, Program Trading, Futures & Options, ETF, Swaps, Fixed Income, and Foreign Exchange.

### “Build vs Buy” or best of both worlds

FlexOMS is a customizable OMS platform with rich APIs to support multiple languages and protocols. It allows for easy integration of in-house and third-party solutions.

### Full front to middle office integrated solution

FlexOMS delivers seamless connection between trading and middle office within a single solution or standalone, including booking, flexible charges & commission calculator, configurable Email confirms, and full CTM integration.

## Service and Deployment

### Choosing a technology partner versus a software vendor

FlexTrade's clients trust our experience to optimize processes and leverage our domain knowledge and best practices.

### Client-dedicated client service model

FlexOMS platform is supported by a dedicated client service team comprising engineers and technical experts who own the relationship from implementation to post-go-live.

### Flexible Deployment Options

FlexOMS can be deployed to fit your operations and technology strategy on-premises or fully hosted solution.

### Client-driven development and Innovation

FlexTrade's extensive domain experts work with clients to deliver bespoke enhancements, functionality, and integrations.

## About Us

FlexTrade Systems is a global financial technology firm that aims to boost trading efficiency by simplifying the complexities of today's trading workflows by providing a unified, open-architecture multi-asset sell-side trading platform. FlexTrade achieves this by underpinning cutting-edge, API-rich technology with highly-specialized service and support for high touch and low touch businesses across cash, program trading, futures & options, ETF, swaps, and foreign exchange workflows. Whether the focus is market-making, agency, retail, or proprietary trading desks, FlexTrade can enhance STP for the complete order management lifecycle from order receipt and trading to middle and back-office workflows, in a single modular technology platform.
