

JOB NOTICE

This notice is provided in connection with our wish to employ an H-1B nonimmigrant worker and the filing of a Labor Condition Application (LCA). A petition will be filed for one H-1B visa. An LCA will be filed within 30 days and will be available for public inspection at our company office for ten days. Complaints alleging misrepresentation of material facts in the LCA, which is available for inspection at our principal place of business, and/or failure to comply with the terms of the LCA may be filed with any office of the Wage and Hour Division of the United States Department of Labor.

Position offered: **Senior Software Developer**

Main Duties:

- Develop and manage FlexFX proprietary trading system that is licensed to buy-side firms including institutional Asset Managers and Hedge Funds across U.S., Europe and Asia providing an integrated trading platform which includes multi-user portfolio management, real time market data pricing, risk management, post trade transaction cost analysis.
- Design, develop and implement real-time automated trading algorithms, execution and custom allocation strategies for foreign exchange traded instruments using C, C++, Java on Linux and Windows platform.
- Enhance frontend Windows GUI C++ application that accesses fragmented liquidity pools in OTC traded FX instruments.
- Develop and implement solutions for integrating FlexTrade products for their Buy-side and Sell-side accounts. Develop customized trading software for buy-side and sell-side firms using C, C++, Java, Python programming languages.
- Design, develop and maintain complex trading algorithms like Vwap, Peg, Time slice, Random slice, OCO used by buy-side and sell-side firms in real-time.
- Perform day to day production support and troubleshooting related to trading system, real-time trading algorithms and execution strategies, market data and report generation scripts using C, C++, Java, Python.
